

Training: Exploring Skill and Strength for Professional growth (11-11-21)

An international training on Exploring Skill and Strength for Professional growth was organized by department of Agricultural Engineering MNS University of Agriculture Multan. The International mentor and trainer Miss Farhana Rizvi was invited for this training. She is ICCRC registered consultant and have been engaged in business for Immigration and International student admissions for the last 10 years.

She provides counselling to prospective students who were interested in considering higher-education opportunities abroad especially within Canada. She guides students in choosing a program from a wide selection of universities and colleges across the country and helping them with the admission process. She provides suggestions based on student's interests and ability and also guide international student upon arrival in Canada on boarding and lodging. During her address she focus on the need of education assessment and language preparations. She also announced that she will provide free consultancy to MNSUAM graduates and also help them with their initial documentation requirement.
