

[4] Water (WR)

[4.5] Water pollution control in campus area

Water Pollution Control (Muhammad Nawaz Shareef, University of Agriculture Multan)

Description:

The management at MNS University of Agriculture is much concerned about the water pollution and use the phytoremediation technique to treat the water pollution. The frequent sampling for BOD analysis, COD analysis, heavy metals analysis and emerging organic pollutant analysis is done. The treated water blended with canal water or groundwater is then used for agriculture purposes. In addition to that MNS University of Agriculture also do the sampling of the adjacent canal and issue the advisory to avoid the surface water pollution.
